

A place to stay Building **A** to **E**

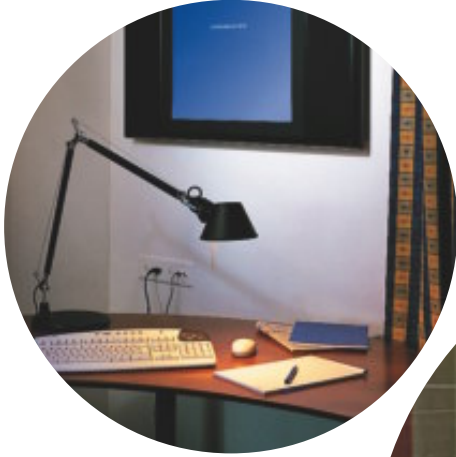

Guest rooms are located in five different buildings connected by underground tunnels. With historic architectural features and breathtaking views, no two rooms are quite the same. Each room is equipped with the latest technology for on-site information services, communication and work, as well as all the essentials for enjoying your down time. For your comfort all guest rooms are non-smoking.

In addition to a telephone and modem connection, each guest room includes a large flat-screen wall monitor and remote control that serves as a computer offering Internet access, an on-site information system, television and radio.

Wall outlet adapters make your personal electrical devices from anywhere in the world useable.
