Five main types of insurance cover in Zurich MIA

Example – For an Australian company with global operations:

1. **Non-admitted ground-up insurance** – The Australian company has a subsidiary with a plant in China and wants to know whether it is permitted to cover that plant ground up, or to purchase local insurance.
2. **DIC/DIL insurance in addition to local ground-up insurance** – The company decides to purchase local cover in China but the limits are lower than on the master contract in Australia. Can it bridge the gap by including a difference in limit coverage?
3. **Non-admitted excess layer insurance on top of primary layer** – The company would like to spread its risk across multiple insurers and so has agreed to an excess line construct. What non-admitted implications does it need to take into consideration for the excess line coverage?
4. **Non-admitted insurer covering risk in another country without the presence of a legal entity** – The company purchases a warehouse in New Zealand for storing goods and the company has no legal entity in New Zealand with whom to bind a local policy. Is this permissible?
5. **Non-admitted insurer concluding master policy with a customer entity located in another country** – The company believes its insurance requirements could be better met by purchasing insurance from the Hong Kong insurance market. Is this permissible?
